Sierra Club Green Alpha Portfolio

Portfolio Profile
December 31, 2014

The Sierra Club Green Alpha Portfolio

1. A partnership between Green Alpha Advisors and the Sierra club to develop a cutting-edge stock selection process
2. An active, long- equity strategy operating in compliance with the Sierra Club's strict social and environmental criteria and Green Alpha's Next Economy™ methodology

Macro Thesis

Using science-driven, fundamentals based research, Green Alpha Advisors invests in companies whose innovative products and services address an increasingly warmer, more populous and resource constrained planet. We develop financial and investment models of an economy that can thrive within Earth's systems profitably and sustainably. This approach spans global sectors and defines the *eco-efficient* frontier of the Next Economy.

Investment Process

Green Alpha begins the investment process by asking, "Does a company, in aggregate, mitigate or contribute to the systemic risks of resource scarcity, climate change or population growth?" The resulting list of Next Economy candidates are then vetted using time-tested growth and valuation methodologies* which include:

- Favorable valuation metrics; EPS growth, balance sheet strength, relatively low price to book and manageable debt characteristics
- Accelerating sector, industry and company growth prospects
- Business model defensibility; high barriers to entry, strong intellectual property
- Seasoned and effective management, aligned with Green Alpha's Next Economy vision

Green Alpha seeks companies at the intersection of innovation, profitability and growth. Green Alpha Advisors invests for the Next Economy.

Sierra Club Green Alpha Portfolio Management

The Sierra Club Green Alpha Portfolio is unique among our portfolios in that it is a blend of Green Alpha Advisors' Next Economy universe and the Sierra Club's proprietary environmental and social investment guidelines. The intersection of these two green stock selection processes produces the Sierra Club Green Alpha Portfolio, possibly the most eco-efficient stock portfolio on Earth.
